The **Settings** -> **Classes** option allows you to create and import classes, as well as have a complete view of them. It shows relevant information, such as:

- Class name
- Grade
- Start and end dates
- iRead (active/deactive)
- Class code
- Number of students

The **Training manager** has access to all the information of the created classes, can import classes, and create new classes.

The list shows essential information about the class such as: name, level, start and end dates, the option to enable/disable iRead, class code, and number of students.

The screenshot shows the 'Classes' management interface. At the top, there are tabs for 'Go to Dashboard', 'Classes', 'Users', and 'Institutions'. Below the tabs, there's a search bar and filters for 'Import Class', 'New Class', 'Level' (set to 'All'), and date ranges (08/09/2024 to 30/12/2025). The main table lists classes with columns: CLASS NAME, GRADE, DATES, IREAD, CODE, and STUDENTS. The table contains 8 rows of class data.
