Why is there material visible in Class Material for a class that students cannot see?

09/01/2025 2:59 pm EDT

This happens because there are teacher-specific materials that have been configured with restricted access.

Instead of the content, students will see a message indicating that they do not have access to that material.

This feature allows teachers to have support resources that don't necessarily need to be visible to students, such as guides, rubrics, or internal documents.
