

Why can't I assign the Diagnostic Tests of a certain level to a specific class?

08/14/2025 1:58 pm EDT

[Leer artículo en español](#)

The <Diagnostic Tests> are divided by educational levels into two categories:

- **Lower Primary:** designed for 1st, 2nd, and 3rd grades (corresponds to the Lower Primary 3 and 4 Diagnostic Test).
- **Upper Primary:** designed for 4th, 5th, and 6th grades (corresponds to the Upper Primary 5 and 6 Diagnostic Test).

If, as a teacher, you want to assign a test different from the one assigned by default to the class level, you must do so through the class settings:

1. Go to **Settings**.
2. Change the **Test level** field to the desired level.

Important:

In some countries, it is not possible to change the Test level without also changing the class level and grade. In such cases, modifying the available test would require setting the class to a different grade than the actual one, which could affect other academic or administrative aspects.

Recommendation:

Be sure to validate this configuration according to local policies and restrictions before changing the grade or level of a class.
