Download mobile PWA

11/13/2025 5:58 pm EST

✅ **[Download desktop PWA](#)**

✅ It is a feature that allows users to access study materials and complete activities without an internet connection. This feature is especially useful in environments with limited connectivity or to facilitate learning on the go.

ℹ️ The products available for download are:
- eBooks
- Activities from Author

Offline Functionality in Richmond Studio

App Download

- The application must be downloaded through the PWA (Progressive Web App).

Android

How to download a PWA on Android?

- Open the browser (usually Google Chrome).

- Go to the website of the application you want to install as a PWA.

- Wait for the page to fully load.

- In the top right corner, tap the three-dot icon (options menu).

- Select the option **<Add to Home screen>** or **<Install app>** (depending on the browser).

- Enter the name you want to use to identify the app on your home screen (optional).

- Click on **<Install>**.

Your browser does not support
HTML5 video.

The PWA will be downloaded and will appear as an **icon on your home screen**, just like a regular app.

iOS

How to download a PWA on iPhone / iPad?

- Open the browser (usually Safari).

- Go to the website of the application you want to install as a PWA.

- Click on the **<Share option>** (square with an upward arrow).

- Scroll through the options and choose **<Add to Home Screen>**.

- Change the name if you want and tap **<Add>**.

Your browser does not support
HTML5 video.

ℹ️ Open the app from the icon that was added to the Home Screen (it runs in full screen, like an app).

🔔 Note that the **\<Expand\>** option in Richmond Studio's PWA is unavailable when accessed on an iPad.

✅ **Considerations:**
- I don't see "Add to Home Screen / Install": the site may not be a PWA. On iPhone/iPad, only Safari allows app-like installation; other browsers only create shortcuts.
- **Updates:** PWAs update automatically; if something doesn't appear, close and reopen the app or force a reload within the PWA.
- **Permissions** (notifications, camera, location): granted the first time the app requests them to function properly.
- **Uninstall:**
  - iPhone/iPad: press and hold the icon ▸ **Delete App**
  - Android devices: press and hold the icon ▸ **Uninstall**

🔔 Important: If you are a user accessing through EDi, the PWA is not available at the moment.
