---

Manual Marking notifications are available from the Dashboard widgets.

When an alert appears instead of a grade, it means you still need to assign a manual grade for that activity completed by the student.

This usually happens in activities that require manual review, such as voice recognition tasks and open-ended questions.

## What to do in this case?

1. Open the class you want to review from the Dashboard.
2. Go to **<Assignments>** and select the assignment you want to review.
3. Select the **<Students>** tab.
4. Click on the name of the student who appears in the list with the alert.
5. You will see the LOs that require grading.
6. Assign the appropriate grade and feedback for the student.
7. Click on **<Submit marks>**.
