Self-registered students

If you want to add a new product, you need an access code (token).

Access codes can be obtained in the following ways:

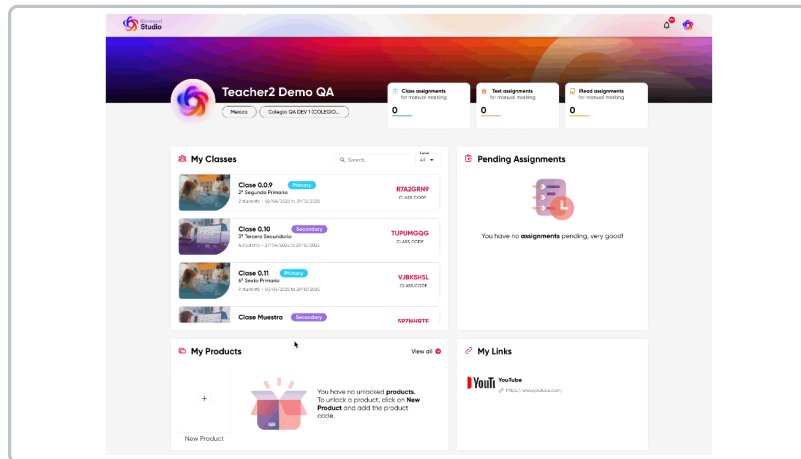

- When you purchase any book through your local distributor, the code may be printed or attached inside the book.
- The institution you belong to can provide you with the code.

If you cannot find your access code, please ask your teacher for help.

To add products:

1. Select the <My products> option.
2. Click <New product>.
3. Enter the corresponding token.
4. Click <Add product>.

The added products will be visible in the <My Classes> section, under <Class Materials>.

Each access code is valid for 12 months from the moment it is redeemed for the first time.
