New Studio Version - December

User grades are displayed when reopening a task.

Teachers can view student grades directly without needing to open a pop-up window.

iRead closing

When browsing on a tablet, **iRead** closes smoothly using the **Close** option.

Student Assignment

Students can be added without issues to an active assignment.

Close with <X button>

When browsing from a mobile device, the **X** button closes the activity.

Sidebar collapses when opening a class

To improve visibility, the sidebar collapses automatically when a class is opened in iPad.

Correct series view

When browsing from an iPad, the series tasks in class materials view displays correctly and clearly.

Correct forum view

In forums, closed topics no longer remain open.

Activation of the <Save> button

Once the student submits the activity, the **Save** button is disabled.

Pagination on iPad

When browsing on an iPad, pagination is available for faster and clearer navigation between tasks.

Date selection

When selecting a date, it is chosen and updated without issues.

Faster content view

If users only have one enabled class, they will have direct access to the material without needing to open the dashboard.

Send grade

The **Send Grade** button is correctly activated when required.

Hotspot restart

The Hotspot can now be restarted in online mode (iPad Web and PWA).

Impersonate functionality in Richmond Studio

As a CTM or CTV, you can impersonate a TM, teacher, or student within the institution from **Settings** → **Users** without needing their password, allowing you to troubleshoot and guide them directly on the platform.

On iPad, you can see the answers you submitted in the Assignments.

As a student, when using iPads, the answers you provided in the activities are displayed correctly.
