## Profile with avatar and banner gallery

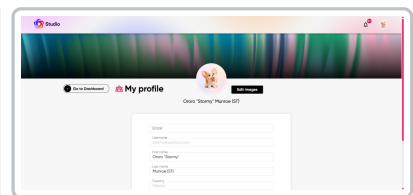

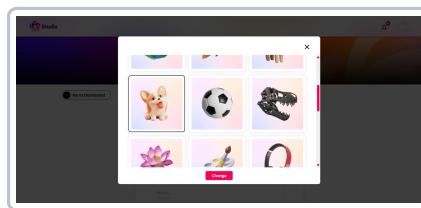

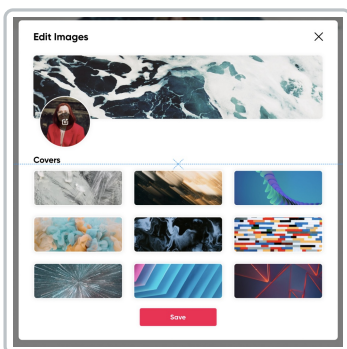

Now you can choose from predefined avatars and explore banner galleries directly from your profile.

### What's new?

- **Custom avatars**  
Select the avatar that best represents you in seconds.
- **Banner gallery**  
Explore and choose visual styles that reflect your personality and style.
- **Real-time updates**  
Your selection will automatically appear in:
  - The main dashboard.
  - The header menu.
  - Your classes and spaces within the platform.

### Why is this great?

- Give identity to your classes.
- Create more engaging environments.
- Express your style.
- Enjoy a more visual and fun experience.

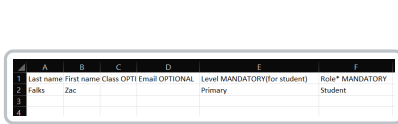

## Automatic username generation

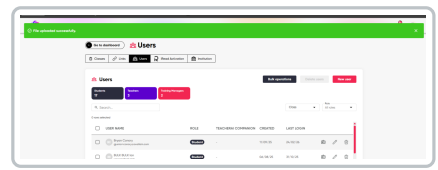

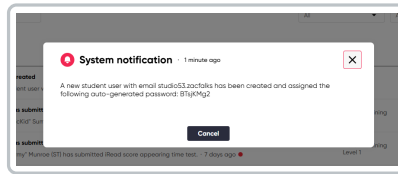

Create multiple users faster and more easily. The process has been optimized so that when performing a bulk user upload, the platform automatically generates usernames for you.

## What does this mean?

- Save time by not having to create usernames manually.
- Reduce errors in name assignment.
- Simplify the management of large groups.

A	B	C	D
Unit name	First name	Class	OPTI Email
Falks	Zac	OPTIONAL	Level: MANDATORY (for students)
		Primary	Role: MANDATORY Student

## Management of topics created by students

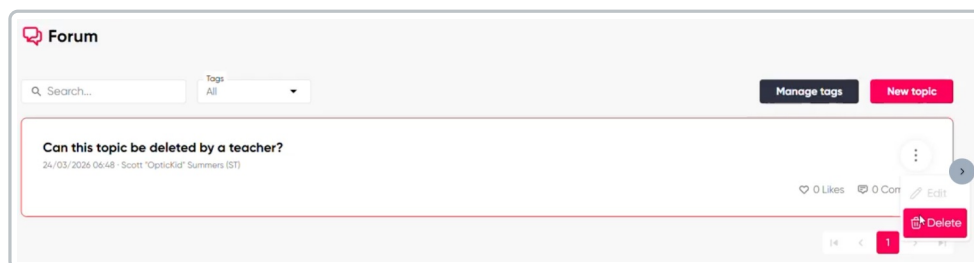

Now, as a teacher, you can easily delete topics in forums created by students.

## What does this improvement allow?

- Keep conversations relevant and organized.
- Remove inappropriate content.
- Foster a clearer and more respectful participation environment.

## How does it work?

Within the forum, you can manage topics and delete those you consider necessary.

## Seamless bulk operations template download

When downloading the bulk operations template from browsers like Edge or Chrome.

## What does this mean?

- Fast and error-free downloads.
- Templates ready to use.

## Access to scores from assignments

---

You will be able to view grades by accessing the details of each assignment, all in one place.

### What does this improvement allow?

- Review grades quickly and in an organized way.
- Have better control over each student's progress.
- Identify areas of opportunity and provide timely feedback.

### How does it work?

Go to the assignment you want to review and access its details—there you will find all the information.

### Automatic assignment of reading in your tasks

When assigning an interactive from the <Assign> tab within the book modal, the iRead reading component will be automatically added to the assignment.

### What does this mean?

- Ensure every assignment includes its reading component.
- Enhance interactives with complementary content.
- Provide a more comprehensive learning experience.

### For students:

- Access both the activity and reading in one place.
- Better understand topics before interacting.
- Enjoy a more complete learning experience.

### We improved your experience when completing activities

The experience for students when completing a LO (Learning Object) has been optimized, ensuring that results remain accurate and up to date.

### What changes with this improvement?

- Clearer visualization of progress when completing activities.
- Data updated immediately.
- Each time a student completes an activity, the results are reflected correctly.

**iRead score appearing time test**

Start dates: 19/03/2026 00:00      Due date: 26/03/2026 23:59

CONTENT	PROGRESS	SCORE
Chapter 2: A kangaroo!	3/3	-
Chapter 2: Reading 1	✓	100%
Chapter 2: Vocabulary	✓	100%

Cancel Save

### Offline content stability

Improvement in the persistence of LO (Learning Objects) for offline use. The goal is to ensure that downloaded content remains available correctly, even after several days without an internet connection.

#### What does this achieve?

- Greater reliability when accessing content offline.
- Continuous experience, even without internet.
- Confidence that materials will be available when needed.

### Improvement in editing active assignments

#### What improved?

- As a teacher, you can now freely add and unselect students before saving changes.
- Greater control and flexibility when editing assignments.
- A more intuitive, blockage-free experience.
- You can only unselect students who were not part of the initial setup.
- The integrity of previously assigned students is maintained.

### Improvement in the learning experience

An improvement has been implemented when self-study consumption is enabled. Now, <My Products> works only as a visual entry point, displaying the covers of available content without allowing direct access.

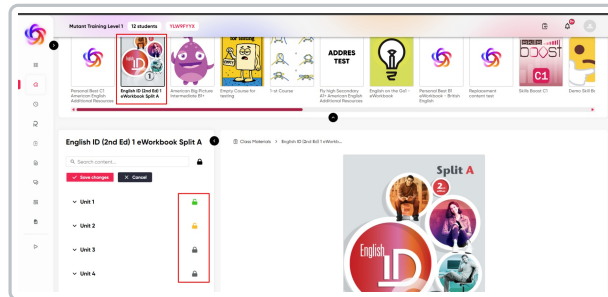

## What improved?

### For students:

- They can still view the covers of their products.
- When clicking, they are automatically redirected to Class Materials.
- Content access happens within the proper learning flow.

### For teachers:

- Greater control over how and where students consume content.

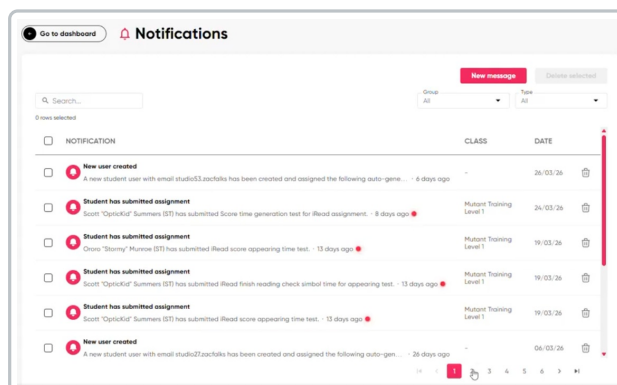

## Improvement in notification navigation

## What improved?

- Smooth navigation between notification pages.
- Content updates correctly when changing pages.
- Better experience when reviewing notification information.

Now, when interacting with pagination:

- You will be taken to the selected page.
- You will see the corresponding content without errors.

## User level is now mandatory

The user level will be a mandatory field in all user creation processes.

## Why is this important?

Selecting the level (preschool / primary / secondary) allows:

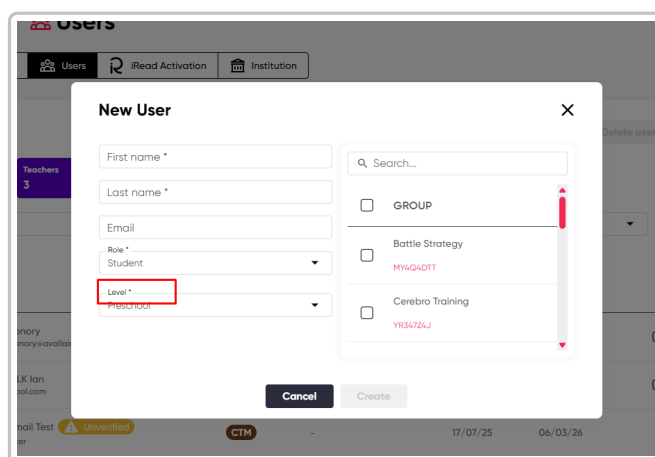

- Displaying the correct interface based on the selected level.
- Adapting the learning experience.

## Training managers

The **level** field is now required in:

- Settings → Users → Create user.
- Bulk uploads (CSV).

This ensures that all users have an appropriate experience from the start.

The screenshot shows a 'New User' form with the following fields: First name, Last name, Email, Role (dropdown menu set to 'Student'), and Level (dropdown menu set to 'Preschool'). A search bar is located above the group selection area. The group selection area contains a search bar and a list of groups: GROUP, Battle Strategy, MYG4DIT, Cerebro Training, and YR34724J. The Level field is highlighted with a red box. The form has 'Cancel' and 'Create' buttons at the bottom.

## Improvement in user changes within a class

When changing a student's class, the system could display two active classes, even when the student was only enrolled in one.

## What improved?

- Correct display of the assigned class.
- Greater clarity when managing student movements.
- Accurate and reliable information.

Now, when updating a student's class:

- Only the correct and current class will be shown.
- Duplicate class display is prevented.

## Email validation system

An email validation system has been implemented to ensure that all communications reach each user correctly.

## How does it work?

### When a user changes their email address:

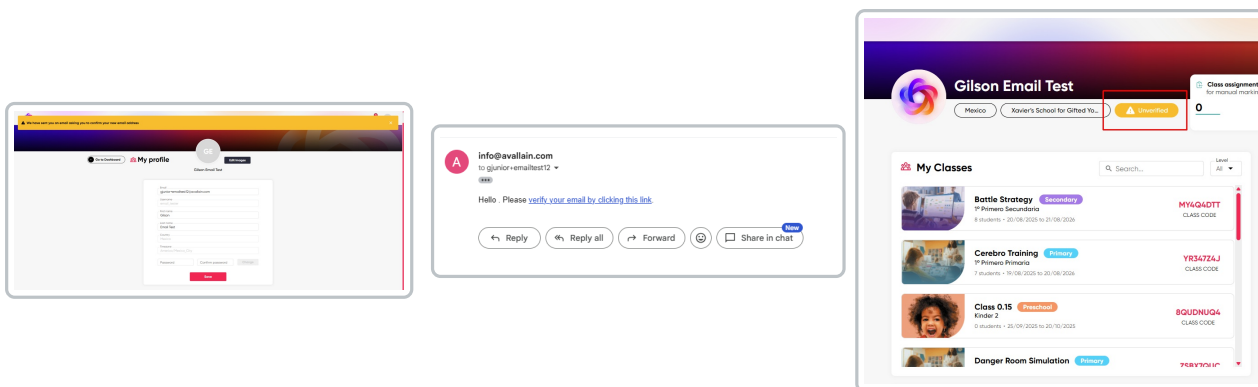

- They will receive a validation email at the new address.
- Their status will change to **<Unverified>** (shown as a badge next to the email).

### While the email is not verified:

- They will not receive notifications or any email communications.

### Once validation is completed:

- They just need to click the link in the email.
- Their status will automatically return to verified.
- Notifications will be reactivated.

## iRead with multiple educational levels

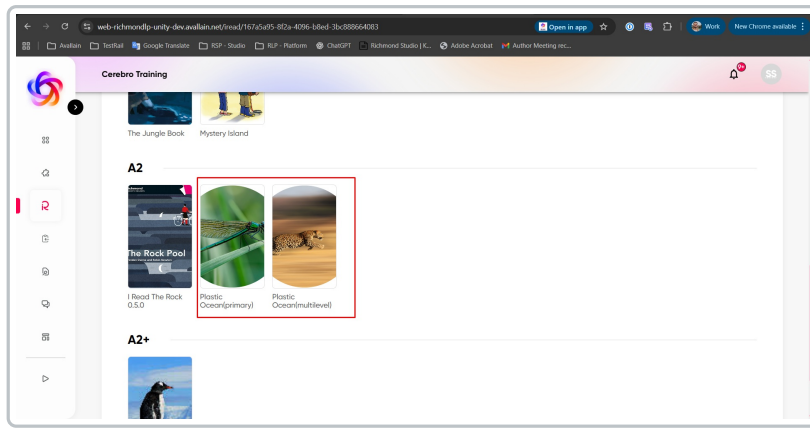

iRead products can now be available across multiple educational levels at the same time.

## What improved?

- Multiple levels can now be selected using checkboxes.
- A single iRead book can be available for:
  - Preschool
  - Primary
  - Secondary
  - Adults

## How does it work?

- Studio allows assigning multiple levels in iRead.
- When importing courses, all selected levels are correctly preserved.

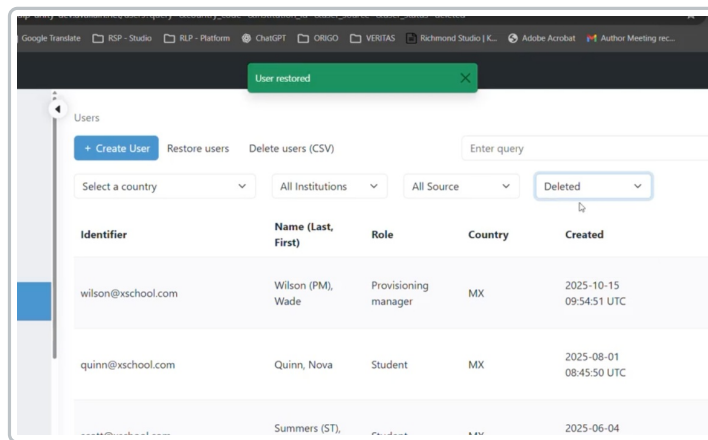

## User restore

Users can now be restored directly from Studio CMS.

### What improved?

- Recovery of deleted users
- Avoids the need to recreate accounts
- Preserves user history and information

## Improvement in score display in iRead

Scores now update automatically.

### What improved?

- Scores are displayed immediately after completing a LO.
- No need to exit or reload the activity.
- More efficient real-time tracking.

**Score time generation test for iRead assignment**

Start dates: 24/03/2026 00:00      Due date: 31/03/2026 23:59

CONTENT	PROGRESS	SCORE
Chapter 1: C.C. wants to travel	i-Read: C.C. goes to India <span style="color: green;">✔</span>	-
Chapter 2: A kangaroo!	i-Read: C.C. goes to India	-
Chapter 3: Lots to see!	i-Read: C.C. goes to India	-
Chapter 3: Reading 1	i-Read: C.C. goes to India	-
Chapter 3: Reading 2	i-Read: C.C. goes to India	-

## Country-based content adaptation in Studio

Some iRead books can now be restricted by country, ensuring that each user only accesses content permitted in their region.

### How does it work?

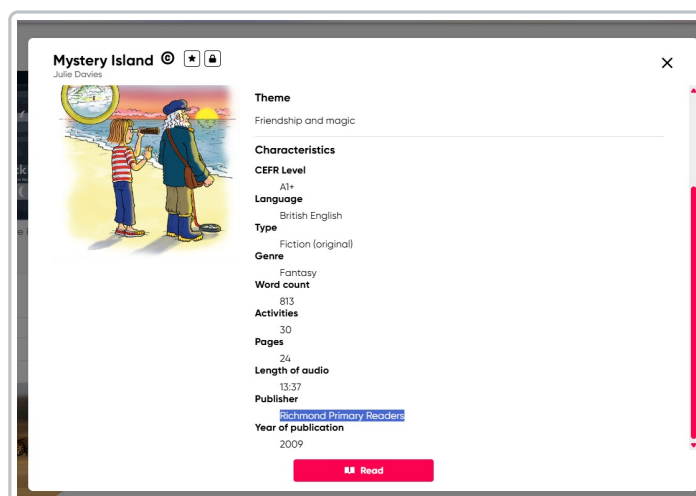

#### CMS configuration

- Define which publishers are restricted for each country

#### Application

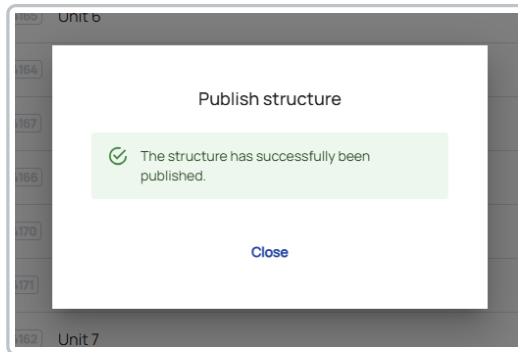

- Studio automatically evaluates the user's context:
  - Country
  - Institution
  - Applicable commercial context

With this configuration, books from restricted publishers are not displayed or available in those countries.

## Update on content publishing from Author to Studio

A behavior was identified in content publishing from <Author> to <Studio> where the display name of assets was not reflected correctly and the file name was shown across the entire structure; however, this issue has now been fixed, ensuring that names are displayed properly on the platform.

### Exclusive use of email

If an email address is included in the template, it will be correctly preserved during bulk import.

### Product batch editing

It is now possible to easily add or remove products within batches created in the CMS.

### What improved?

- Modify batches without needing to recreate them.
- Add new products as needed.
- Remove products that no longer apply.
- Keep configurations up to date.
